PUBLIC NOTICE

To ensure a safe drinking water supply, Lake City Utilities will be adding chlorine to the water system from July 16 through July 22, 2017. The addition of chlorine to disinfect water can react with iron and/or manganese, creating a black or reddish discoloration, but does not cause a health concern. Citizens can let the water run a few minutes to flush faucets of discolored water before using for cooking or laundry. Use of chlorine can cause problems in fish tanks and commercial operations such as bait shops. It is recommended that these uses find an alternate source of water during this period or use commercially available chemicals that neutralize chlorine. Presence of chlorine will remain a few days following the treatment period. Questions can be referred to Scott Jensen at 651-345-6850 or Mike Tucker at 651-380-0300.
