BRAIN TEASER

An ocean liner is docked in a harbor. Hanging over the side of the hull, perfectly straight down, is a rope ladder with 12 rungs in total, each spaced exactly 1 foot apart.

Currently, the very bottom rung is resting right on the surface of the water. If the tide rises steadily at a rate of 6 inches per hour, how many rungs of the ladder will be completely underwater after 4 hours?

Look for the answer in this week's Graphic!
